

Take a moment to see, if you get this:

- There is **13 trillion** dollars in existing IRA's
- The average IRA balance is \$127,304
- There are 1.32 million licensed agents in the country
- 90% of all licensed agents are NOT making money in this economy.
- As an agent, your commission on an average IRA rollover is slightly over **\$7,600**. If you were a broker with downline of agents your commission would be over **\$10,000**.
- So, the answer is come on board with us **before** someone else recruits you into **THEIR downline**.

If you had 10 agents that all did 1M of IRA rollovers (about 8 a year) your override would be \$200,000.

If you had 50 agents, your override would be \$1,000,000.

Figure out how big you want your company to be.

And there is a super secret DOWNLINE AGENT FORMULA on the next page. If you have any trouble figuring it out, ask your husband, wife, boyfriend, girlfriend or any 9 year old, because they will surely understand it.

Hope to have you on board SOON!

Psst...don't forget to scroll down to the formula.

If you DO NOT
have a downline

Recruit your
Upline's Downline

And then...well
you figure out
how the rest
of the story
goes

And THAT is the Magic Downline Formula
